

PORTFOLIO

KEVIN MONTALVAN | 3D modeler and Graphic Designer

Welcome

I focus on designing 3D models, and working on Visual Art projects to put together anything that seemed just a vague idea; into reality. The early passion I experienced as a kid for cartoons, video games, album covers, and YouTube editions shaped myself as an independent artist. In this way, I am pursuing my career as a Graphic Designer and Animator. I started making busts and full-body characters as a way to build my professional portfolio, however; I want to reach a higher point where I can do rigging, lettering, and illustrations to complement my artwork.
